Architecture

Business Architecture

Defines how an organization is structured and explains how elements such as capabilities, processes, organization and information fit together.

Snippet from *Wikipedia*: **Business architecture**

> In the business sector, **business architecture** is a discipline that "represents holistic, multidimensional business views of: capabilities, end-to-end value delivery, information, and organizational structure; and the relationships among these business views and strategies, products, policies, initiatives, and stakeholders."
>
> In application, business architecture provides a bridge between an enterprise business model and enterprise strategy on one side, and the business functionality of the enterprise on the other side. It often enables the Strategy to Execution methodology.
>
> People who develop and maintain business architecture are known as business architects.
