# Release Notes Template

## What is Release Notes Template?

A Release Notes Template is a structured document that outlines the details and changes associated with a new software release, serving as a critical communication tool for stakeholders within an enterprise architecture framework like TOGAF. It typically includes sections such as version number, release date, new features, bug fixes, enhancements, known issues, and instructions for deployment, ensuring that all relevant parties—ranging from developers to end-users—understand the impact and scope of changes. Utilizing a Release Notes Template aligns with best practices in project management by promoting clarity, consistency, and traceability, which are essential in managing complex enterprise solutions and facilitating effective change management within a structured architecture framework.

### AI Prompt: Release Notes Template

Imagine you're an [Application Lifecycle Management] guru tasked with creating a comprehensive [Release Notes Template] for a software project. Your goal is to help teams communicate updates effectively to stakeholders. Can you develop a template that includes sections like [version number], [release date], [new features], [bug fixes], and [known issues]? For inspiration, consider existing templates from popular tools and adapt them to fit your organization's needs. Furthermore, ensure the template is customizable, allowing teams to add sections for [user feedback] or [performance improvements]. The final output should be a polished, professional document ready for presentation that not only informs but also engages readers, enhancing the overall awareness and usability of updates across teams.
