

# DevOps Definitions

 - Work in Progress

DevOps aims for better communication and collaboration between Development and IT Operations. The goal is to reduce friction and increase velocity to provide the agility needed to quickly take advantage of increasingly faster paced business demands.

## What Is DevOps?

DevOps is the union of people, process, and products to enable continuous delivery of value to our end users. — [Donovan Brown](#)

## Wikipedia

DevOps (a clipped compound of “development” and “operations”) is a culture, movement or practice that emphasizes the collaboration and communication of both software developers and other information-technology (IT) professionals while automating the process of software delivery and infrastructure changes. It aims at establishing a culture and environment where building, testing, and releasing software, can happen rapidly, frequently, and more reliably.

## Unsorted

- DevOps is a term for a group of concepts that, while not all new, have catalyzed into a movement and are rapidly spreading throughout the technical community.
- DevOps literally means developers and operations. It’s a contraction. The concept behind it is getting developers and operations folk to work closely together to benefit the business. The goal is to reduce friction and increase velocity.
