BigPanda Autonomous Operations platform helps overwhelmed and understaffed IT Ops and NOC teams detect, investigate, and resolve IT incidents faster and more easily than ever before. Powered by Open Box Machine Learning, BigPanda correlates IT noise into insights, automates incident management, and unifies fragmented IT operations.

Snippet from [Wikipedia](#): **BigPanda**

BigPanda is a private software company headquartered in Redwood City, California. BigPanda Incident Intelligence and Automation, powered by AIOps, supports companies to prevent service outages and improve incident management.

BigPanda was founded in 2012 with \$1.5 million in initial funding. Two years later, the company came out of stealth mode, took its software-as-a-service product out of beta, and announced \$7 million in Series A funding. This was followed by a Series B funding round in 2015 that was originally for \$16 million then grew by \$23 million more. A Series C funding round in late 2019 raised another \$50 million for international expansion and product development. BigPanda became valued at \$1.2 billion following a new Series D & E round bringing its total capital to \$340 million.
