What is codeBeamer?

codeBeamer is a **web-based application lifecycle management (ALM)** software developed by Intland Software. It is a comprehensive platform that provides end-to-end support for the entire software development process, from requirements management, through development, testing, quality assurance, release management, and maintenance. codeBeamer includes a range of features and tools, such as task management, issue tracking, version control, document management, test management, and collaboration. It is designed to help software development teams improve their efficiency, productivity, and quality, by providing a centralized platform for all development activities, and facilitating communication and collaboration between team members. codeBeamer is used by a wide range of organizations, including automotive, medical device, aerospace, and other safety-critical industries, as well as government agencies and academic institutions.
