## **Docker**

https://www.docker.com

Snippet from Wikipedia: **Docker (software)** 

**Docker** is a set of platform as a service (PaaS) products that use OS-level virtualization to deliver software in packages called *containers*. The service has both free and premium tiers. The software that hosts the containers is called **Docker Engine**. It was first released in 2013 and is developed by Docker, Inc.

Docker is a tool that is used to automate the deployment of applications in lightweight containers so that applications can work efficiently in different environments in isolation.
