What Is Spinnaker?

Spinnaker is a continuous delivery tool that helps you be intentional about how you ship software by granting visibility & control into your software delivery process. Specifically, Spinnaker is an **open source, multicloud, continuous delivery platform**.

*Snippet from Wikipedia: **Spinnaker (software)***

> **Spinnaker** is a free and open-source continuous delivery software platform originally developed by Netflix and extended by Google. It is designed to work with Kubernetes, Google Cloud Platform, AWS, Microsoft Azure and Oracle Cloud.
>
> Spinnaker was developed by Netflix as a successor to the internally developed Asgard. It was released under the Apache License 2.0 on November 16, 2015 and has been adopted by tech companies.
