Snippet from *Wikipedia*: **StarTeam**

StarTeam is a version control system used in software development, especially when a project involves multiple teams in different locations. StarTeam is an SCM and SDLC software application, created by Starbase Corporation, which was acquired by Borland in January 2003 which was acquired by Micro Focus in July 2009 and later acquired by OpenText in 2023. The application is client-server, backed by a relational database that retains all changes made to a project during its evolution as well as the project requirements, task assignments, threaded discussions and bug tracking. Microsoft SQL Server and Oracle database are supported database servers.
