See [Azure DevOps Services](#)

Team Foundation Server (<i>almsuit</i>)	
Full Name	Team Foundation Server
Short Name	TFS
Company	Microsoft
Web	http://www.microsoft.com

Snippet from [Wikipedia](#): [Azure DevOps Server](#)

Azure DevOps Server (formerly Team Foundation Server (TFS) and Visual Studio Team System (VSTS)) is a Microsoft product that provides version control (either with Team Foundation Version Control (TFVC) or Git), reporting, requirements management, project management (for both agile software development and waterfall teams), automated builds, testing and release management capabilities. It covers the entire application lifecycle and enables DevOps capabilities. Azure DevOps can be used as a back-end to numerous integrated development environments (IDEs) but is tailored for Microsoft Visual Studio and Eclipse on all platforms.
